

## Psychonomic Society Conference Report

Luhe Li

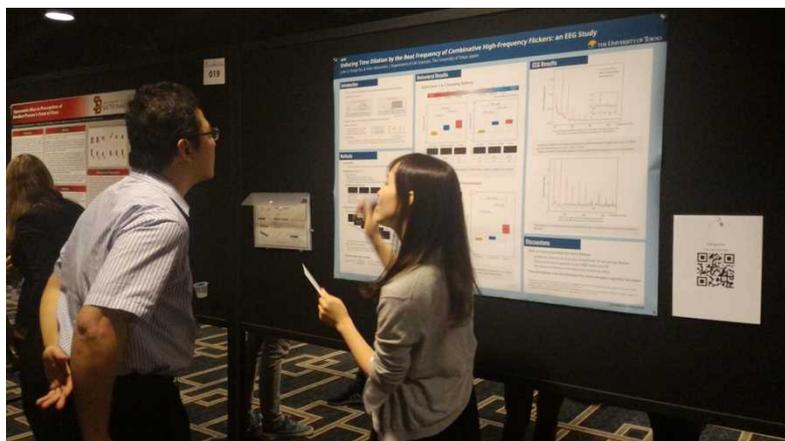

Master student, Department of Life Sciences

Graduate School of Arts and Sciences

With the support of International Conference Travel Grants for graduate students, I went to the 59<sup>th</sup> Annual Meeting of Psychonomic Society in New Orleans to present my poster.

The conference was held between Nov. 14<sup>th</sup> and 18<sup>th</sup>, 2018, and my poster session was on Nov. 17<sup>th</sup>. The work I presented was “Inducing Time Dilation by the Beat Frequency of Combinative High-Frequency Flickers: an EEG Study”. In the short 90-minute session, I presented my work with researchers from different areas and received valuable advice from them. Some of them asked about the theoretical background, while others also provided suggestions for the further analysis.

This experience was really rewarding to me. I had the great sense of achievement talking about my own experiment and findings to other researchers, and the intellectual communication was also very inspiring. Besides, I also learned about the cutting-edge studies in other areas of psychology through various talks. I really appreciate this chance of the conference experience.
